

Water Bill Calculation for 30 days

Firstly check your connection category (Domestic, Samurdhi etc.) and go to relevant table shown in the web (http://www.waterboard.lk/scripts/Downloads/Water_Tariff_E.pdf). As an example, I am going to calculate 24 units for Domestic User consumed during a period of 30 days. Here I am using "Domestic - other than for Samurdhi Recipients" tabled in the Gazette shown in the above link for calculation.

The related table is shown below.

No. of units	Usage Charge (Rs./ Unit)	Monthly Service Charge (Rs.)
00 - 05	3.00	50.00
06 - 10	7.00	65.00
11 - 15	15.00	70.00
16 - 20	30.00	80.00
21 - 25	50.00	100.00
26 - 30	75.00	200.00
31 - 40	90.00	400.00
41 - 50	105.00	650.00
51 - 75	110.00	1,000.00
Over 75	120.00	1,600.00

Then do the calculation as follows

No. of units	Usage Charge (Rs./ Unit)	No. of Unit(s)	Charge (Rs.)
00 - 05	3.00	5	15.00
06 - 10	7.00	5	35.00
11 - 15	15.00	5	75.00
16 - 20	30.00	5	150.00
21 - 25	50.00	4	200.00
Monthly service charge applicable for 24 units			100.00
Total before Tax			575.00
VAT (12%)			69.00
Total Bill			644.00

This way you can calculate your water bill according to the units consumed.

It should be noted that if the meter readings had been taken during a period of more than 30 days, the number of units charged with law rates will be increased proportionately, for the benefit of the customers.
