**Annex 03**

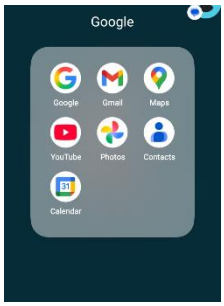

# Instructions on How to Find the Coordinates of Your House

## How to get Coordinates on Android Phones

This instruction sheet explains how to obtain the coordinates of the location of your house using the Google Maps application.

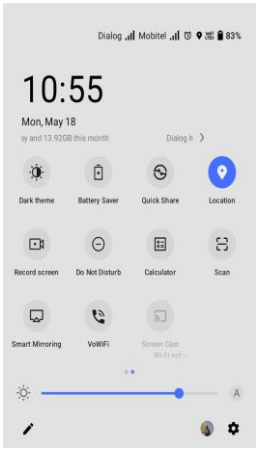

### Steps

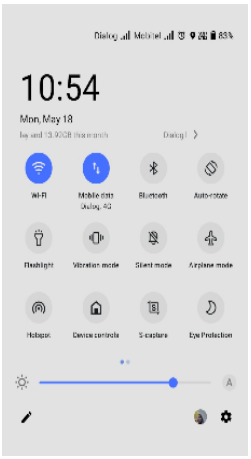

1. Open the Google Maps application.

2. If Google Maps is not installed on your phone, download it from the Play Store.
3. Make sure that your **Location** and **Mobile Data** are enabled.

   Wait for a short time until your location becomes stable.
4. Select **"Find my location"** and zoom in closer to your location.
5. If you are inside the house, go outside and wait until your location becomes fixed.
6. When your location is not fixed accurately, a large light-blue circle may appear around the location marker.

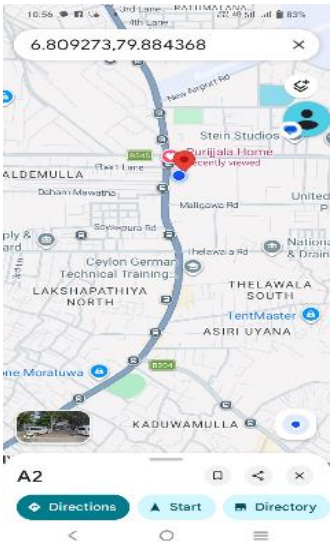

### How to get Coordinates

- Press and hold on the exact spot of your house until a **red pin** appears.
- The **Coordinates** will appear in the search bar or at the bottom of the screen.

Example : Latitue – 6.809273
Longitute – 79.884368
