How to Get Coordinates on iPhones

Step 1 - Open Google Maps on your iPhone.

If you do not have it installed, download it from the Apple App Store.

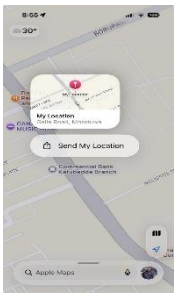

Step 2 - Turn on:

- **Location Services**
- **Mobile Data** or Wi-Fi

To enable Location Services:
1. Open **Settings**
2. Go to **Privacy & Security**
3. Tap **Location Services**
4. Turn it ON
5. Allow access for Google Maps

Step 3- Open Google Maps and tap the **current location** icon.
Wait a few seconds until the blue dot shows your exact location.

Step 4 - Zoom in to your house location.

Step 5 - Press and hold your house location on the map until a **red pin** appears.

Step 6 - The coordinates (Latitude & Longitude) will appear in the search bar or information panel.

Example: - 6.9271, 79.8612

Using Apple Maps (Alternative Method)

You can also use Apple Maps:
1. Open Apple Maps
2. Touch and hold the location
3. A pin will appear
4. Swipe up the information panel
5. The coordinates will be displayed

Tips

- Stand outside the house for better GPS accuracy.
- Wait a few seconds until the blue location circle becomes smaller.
- Use satellite view for better identification of your house.
